

YOUR TERMINAL IN THE ECONOMIC HEART OF GERMANY

At the heart of the German Rhine-Ruhr Metropolitan Area - Germany's leading industrial centre - Hutchison Ports Duisburg offers the fastest and most efficient access to Germany. The inland terminal is connected daily by barge and by rail with the deep-sea terminals of ECT in Rotterdam and several times a week with Antwerp. Hutchison Ports Duisburg is also a shortsea terminal. Situated directly on the Rhine, Hutchison Ports Duisburg has almost one kilometre of quay with three gantry cranes and two rail tracks of 700 metres. Furthermore, onward connections to more than 70 (rail) destinations throughout Europe are available through the adjacent rail terminal of DUSS.

COMPLETE SERVICE PROVISION

At Hutchison Ports Duisburg, customers can benefit from a complete range of logistics services. These vary from the temporary storage of full containers and a fully-fledged empty depot (including cleaning, maintenance and repairs) to the on-demand pre-transport and post-transport of containers right up to the customer's doorstep. In the immediate vicinity of the terminal, numerous reputable logistics service providers operate warehouses for European distribution. Furthermore, paperless transport is available as part of Hutchison Ports Europe Intermodal.
